
PBE / GTH-SZV / GTH-PBE · k=[2, 1, 1] · FFT=[21, 21, 21] · nw=8 · finite-size correction=True
Fractional k: [[0.0, 0.0, 0.0], [-0.5, 0.0, 0.0]]
Failed QP candidates are omitted; full masks/residuals remain in the data.
Discrete finite-model values; no off-mesh GW interpolation or bulk-convergence claim.
