Formaldehyde S1 · RHF/CIS · Cartesian 6-31+G*
Accepted-step tracking; finite-difference curvature, not an AD Hessian
Tracked total excited-state energy
Energy change from distorted start / eV
Min step overlap: 0.996897
Accepted step
Full Cartesian stationarity
Max Cartesian |gradient| / (Eh/Bohr)
Accepted step
Geometry change in the fixed chart
Distorted start
S1 minimum
z / Bohr
y / Bohr
x / Bohr
Local curvature: gradient differences
FD of native AD gradients
FD of PySCF gradients
Minimum: 0.003579 Eh/Bohr²
Chart curvature / (Eh/Bohr²)
Ordered eigenvalue
