Translation-invariance diagnostic from stored data; nonzero curvature is not a physical acoustic gap
Rigid translation: continuum target is zero; no ASR
Signed Rayleigh energy (meV)
1377 K, x/y translations
300 K, x/y translations
800 K, x/y translations

r2scan_szv_fft33_k3
r2scan_szv_fft39_k3
szv_fft21_k3
szv_fft27_k3
szv_fft33_k3
Independent displacement check; no fitted correction
Free-energy change (1e-9 Hartree/cell)
r2scan_szv_fft33_k3: reconverged SCF
r2scan_szv_fft33_k3: DFPT quadratic reference
Euclidean-unit rigid displacement amplitude (Bohr)
