H₂ / 6-31G · identical initial orbitals and nonzero (bond, field) parameters
First = first transformed call after seed SCF; warm = median, whiskers = min/max
HF · E / Eh
PBE · E / Eh
HF · μz / (e bohr)
PBE · μz / (e bohr)
Directly measured wall time / s
explicit
implicit
Forward first
Forward warm
VJP prep first
VJP prep warm
Pullback first
Pullback warm
